

# FISH 200 SAFETY KNIFE

METAL DETECTABLE, REUSABLE SAFETY KNIFE

PAGE 1 of 2

## Product Specifications

KN31F2 | Revised March 2015

**Product Name:** Fish 200

**Product Description:** The Fish 200 is a fully metal detectable, reusable safety knife. The large stainless steel blade is fully concealed for upmost operator safety, this blade is ideally suited for cutting packaging paper, shrink wrap and plastic strapping. The rear hook blade is also made from stainless steel and is designed for cutting through packaging tape, string netting and cardboard. The knife features a simple two screw blade change facility.

The body of the Fish 200 is made from blue metal detectable nylon, the hook cover is made from metal detectable polypropylene. Replacement blades are available to order from BST.

**Product Code:** KN31F2

**Product Colour:** Blue

**Pack Size:** 10 Pack

**Product Advantages:**

- ✓ Can be detected by conventional in line metal detection systems
- ✓ Simple design minimises any potential 'germ traps'
- ✓ Can be used for a variety of applications within hygiene critical processing environments
- ✓ Concealed blades minimise the risk of injury and drawing blood
- ✓ Displays a use of all due diligence in the prevention of foreign body contamination

### Replacement Blades:

Blade Description	Blade Size (mm)	Pack Quantity	Order Code	Image
Hook Blade	41mm x 18mm x 0.61mm	10 Pack	KN35F2BH2M1	
Main Blade	96mm x 12mm x 1mm	10 Pack	KN35F2BSM1

# FISH 200 SAFETY KNIFE

METAL DETECTABLE, REUSABLE SAFTEY KNIFE

PAGE 2 of 2

**Product Material(s):** Metal detectable polypropylene hook cover, metal detectable nylon body, brass screws and stainless steel blades.

## Metal Detectability

The Fish 200 is moulded from an electromagnetically detectable plastic compound. The detectability of these materials will vary based upon the metal detection systems being used and their calibration. All components of this safety knife are manufactured from metal detectable polymers or stainless steel, making the product fully metal detectable. Detectability performance will vary based on, but not limited to the following factors:

- Detector Calibration Levels
- Food Product Type (E.g. Wet, Dry, Frozen, Liquid)
- Aperture Dimensions
- Contaminant Orientation

For this reason BST recommend that all our products be thoroughly tested on your metal detection systems by a trained and certified professional. It may be the case that your equipment needs to be recalibrated in order to reliably detect this product and its fragments. Such a professional should be available by contacting the manufacturer of your metal detection system.
