

# BST PENGUIN 400 SAFETY KNIFE

METAL DETECTABLE, DISPOSABLE SAFETY KNIFE

PAGE 1 of 2

## Product Specifications

KN31P4 | Revised March 2015

**Product Name:** Penguin 400

**Product Description:** The Penguin 400 is a fully metal detectable, disposable safety knife. The stainless steel blade is concealed to protect the operative, the ergonomic handle design allows two passages for piercing and then cutting through shrink wrap, plastic strapping and packaging tape. The body of this knife is manufactured from food safe detectable polypropylene plastic.

**Product Code:** KN31P4

**Product Colour:** Blue, Red, Green, Yellow

**Pack Size:** 10 Pack

**Product Advantages:**

- ✓ Can be detected by conventional in line metal detection systems
- ✓ Simple design minimises any potential 'germ traps'
- ✓ Can be used for a variety of applications within hygiene critical processing environments
- ✓ Concealed blades minimise the risk of injury and drawing blood
- ✓ Displays a use of all due diligence in the prevention of foreign body contamination

**Product Material(s):** Metal Detectable Polypropylene and Stainless Steel

# BST PENGUIN 400 SAFETY KNIFE

METAL DETECTABLE, DISPOSABLE SAFETY KNIFE

PAGE 2 of 2

## Metal Detectability

The Penguin 400 is moulded from an electromagnetically detectable plastic compound. BST recommend that all our products be thoroughly tested on your metal detection systems by a trained and certified professional. The detectability of these materials will vary based upon the metal detection systems being used and their calibration. All components of this safety knife are manufactured from metal detectable polymers or stainless steel, making the product fully metal detectable. Detectability performance will vary based on, but not limited to the following factors:

- Detector Calibration Levels
- Food Product Type (E.g. Wet, Dry, Frozen, Liquid)
- Aperture Dimensions
- Contaminant Orientation

For this reason BST recommend that all our products be thoroughly tested on your metal detection systems by a trained and certified professional. It may be the case that your equipment needs to be recalibrated in order to reliably detect this product and its fragments. Such a professional should be available by contacting the manufacturer of your metal detection system.
