

BST SWAN BAG CUTTER SAFETY KNIFE

METAL DETECTABLE, DISPOSABLE SAFETY KNIFE

PAGE 1 of 2

Product Specifications

KN31S3306MB | Revised March 2015

Product Name: Swan Bag Cutter

Product Description: The Swan is a fully metal detectable, disposable safety knife specifically designed to cut multi-layer paper or plastic bags and sacks. The patented opposed slopes at the back of the blade reduce friction resistance, which enables a smooth and more effective cut. The Swans bade is completely sealed against bacteria with no removable parts. The knife features a pointed nose to pierce and then cut.

Product Code: KN31S3306MB

Product Colour: Blue

Pack Size: 10 Pack

Product Advantages:

- ✓ Can be detected by conventional in line metal detection systems
- ✓ Simple design minimises any potential 'germ traps'
- ✓ Concealed blades minimise the risk of injury and drawing blood
- ✓ Displays a use of all due diligence in the prevention of foreign body contamination

Product Material(s): Metal Detectable Nylon Plastic and Stainless Steel

BST SWAN BAG CUTTER SAFETY KNIFE

METAL DETECTABLE, DISPOSABLE SAFETY KNIFE

PAGE 2 of 2

Metal Detectability

The Swan is moulded from an electromagnetically detectable plastic compound. BST recommend that all our products be thoroughly tested on your metal detection systems by a trained and certified professional. The detectability of these materials will vary based upon the metal detection systems being used and their calibration. All components of this safety knife are manufactured from metal detectable polymers or stainless steel, making the product fully metal detectable. Detectability performance will vary based on, but not limited to the following factors:

- Detector Calibration Levels
- Food Product Type (E.g. Wet, Dry, Frozen, Liquid)
- Aperture Dimensions
- Contaminant Orientation

For this reason BST recommend that all our products be thoroughly tested on your metal detection systems by a trained and certified professional. It may be the case that your equipment needs to be recalibrated in order to reliably detect this product and its fragments. Such a professional should be available by contacting the manufacturer of your metal detection system.

DISCLAIMER
