

BST DETECTABLE ID BADGE HOLDER

METAL DETECTABLE | FOOD SAFE | SECURE | SMART | DURABLE

Product Specifications

TE1BMS8654MB1 | Revised June 2015

Product Description: This fully metal detectable badge holder provides a safe way of displaying your ID cards, perfect for displaying visitor passes or security cards. They feature fixing holes for optional lanyards or clips that allow it to be used in a landscape or portrait format. The holder will securely hold a standard sized ID card, with the same dimensions of a UK Driving Licence (86mm x 54mm).

The holder is manufactured using food grade durable nylon plastic, with interlaced AISI 302 grade stainless steel fibres to give the badge its metal detectable properties.

Metal detectable plastic products are designed to prevent plastics contaminating food and their use displays due diligence in preventing foreign body contamination.

Product Material: Food grade polyamide 6 plastic with interlaced stainless steel fibres

Product Prefix: TE1BMS8654MB1

Product Colour: Blue

Pack Size: 10 Badges

Pack Weight: 0.15kg

Product Advantages:

- ✓ Detectable by in-line metal detection systems
- ✓ Bright blue colour for easy visual identification
- ✓ Strong, durable, smart and convenient
- ✓ Food grade material suitable for food contact applications
- ✓ Can be used as part of HACCP and BRC procedures
- ✓ Displays due diligence in the prevention of foreign body contamination

BST DETECTABLE ID BADGE HOLDER

METAL DETECTABLE | FOOD SAFE | SECURE | SMART | DURABLE

Material Information / Food Contact Status

The base material for this product is AKROMID® B3 polyamide 6 which is approved for food contact under EU directive 2002/72/EC on plastic materials and articles intended to come into contact with food. This base resin contains an evenly dispersed metal detectable pigment (AISI 302 Stainless Steel) which is also generally considered safe and suitable for food contact applications.

Metal Detectability

The material of this holder is intended to be detected by metal detection systems. Detectability performance will vary based on, but not limited to the following factors:

- Detector Calibration Levels
- Food Product Type (E.g. Wet, Dry, Frozen, Liquid)
- Aperture Dimensions
- Contaminant Orientation

For this reason BST recommend that all our products be thoroughly tested on your metal detection systems by a trained and certified professional. It may be the case that your equipment needs to be recalibrated in order to reliably detect this product and its fragments. Such a professional should be available by contacting the manufacturer of your metal detection system.
